

### **Equal opportunities policy.**

All children in my care will be treated as individuals, I will make sure that the individual needs of the children are met and that they all have equal chances to strive and develop within the setting, when preparing activities I will take into account all the ages, abilities, gender, home backgrounds, ethnicity and any disabilities so that each child has the same opportunities, we will be learning about different cultures as well as our own and at all times a positive image will be given to people who are different from ourselves.

I will also appreciate any parental participation helping children to accept differences of others and making it a part of our everyday lives.
